1. Introduction

This software will help the Chatrasahaya to be more efficient in submitting of their requests such as money, food and other needs...and tracking of submission on the maps. It also sends the mails to the internal team to check the submissions quickly. The purpose of this project is to computerize all details regarding submissions from request us, Users can submit their required needs like education, financial, Health...from the **Request Us for Self /For Others** Page by using some fields such as **Name** -- Full Name of the requester , **Phone Number** -- Phone/mobile Number of the Requester , **Location** -- The place of the request where books, chairs, tables are needed for the schools , **Category**-- Its was type of the request such as education, financial, Health **Description** -- Its was the description/overview of the needs , **Aadhar Number** -Its was unique identity number of the requester, **Documents** --- Proof of the documents needs to be uploaded here.

Modules/Features as list below:

- **Home**-It helps to access the other modules in the application from the home page
- **About**-It helps to know the chatrasahaya website details and activities
- **Join Us**-Its helps the people/end users to join in the team by submitting the form
- **Programs** -It helps to know the chatrasahaya programs conducted
- **Contact Us**-Its was useful to the people/end users to contact the team for any issues/queries
- **Request Us**-Its was useful to request the service from the chatrasahaya by submitting the form based on the category
- **Search** -Its was use to search any features or modules.

1.1 Overview

It is meant to delineate the features of Request Us & Maps Menus for the existing application, so as to serve as a guide to the developers on one hand and as a software validation document for the prospective client on the other. Request Us & Maps are two enhancements for the existing application called **chatrasahaya** for a web application. Our application is designed for User/Customer for requesting of required categories like education, financial, Health to gain best education for less budget schools or free schools for the existing application. Maps can show the count for the each state based on requests completed by the users/team.

2. Getting Started

Internal team/End Users should have the laptop and browser installed in their machines to access the application with proper internet connection.

2.1 Set-up Considerations
